*Ty Barker*

In recognition of this individual's efforts and achievements within the Combat Technologies Bowie Knife Instructor's Program, we do hereby present this certification of full instructorship as a tactical trainer of Comtech Bowie Knife Methods. As in keeping with this hard won honor, you are expected to maintain your skills as an instructor and to refine them over the years. It is your duty as a Comtech trained Bowie Knife Instructor, both morally and legally, to employ these Bowie Knife skills only to save lives, never to take lives: that is the other side to the same coin. These are the skills then, of a lost art refound. Truly these methods are those which win out in the bloody fray, for they are swift and terrible in their might. Terrible, too, is the wrath of a trained Bowie adept once evoked, and terrible is the damage done from he who wields the dreaded Bowie knife in righteous indignation and self-preservation. Always think and act wisely. You have now become part of a greater legend. The journey has just begun for you. As a fellow warrior/scholar, we welcome you to the Comtech Circle of Steel.
